INTERNATIONAL LABOUR REVIEW

VOL. LXXXII No. 1g

STATISTICAL SUPPLEMENT

PUBLISHED MONTHLY BY THE INTERNATIONAL LABOUR OFFICE
GENEVA

JULY 1960

SPECIAL ISSUE

Results of the I.L.O. 1959 October Inquiry

Page

Part I : Hourly Wages of Adult Wage Earners in 41 Occupations, October 1959 4

Part II : Monthly Salaries and Normal Hours of Work per Week of Employees in Selected Occupations, October 1959 33
(a) Monthly Salaries 34
(b) Normal Hours of Work per Week 38

Part III : Retail Prices of Selected Consumer Goods, October 1959 . 40

General Note

In the following tables are presented the results of the International Labour Office inquiry into hourly wages of adult wage earners in 41 occupations (Part I), monthly salaries and normal hours of work per week of employees in selected occupations (Part II) and retail prices of selected consumer goods (Part III), in October 1959.

The data have been supplied by national statistical services in response to an I.L.O. inquiry designed to provide internationally comparable statistics of wages, salaries, hours of work and prices in October of each year. Factors that limit the direct comparability of the data (e.g. differences in definition, specification, date of reference, etc.) as well as figures computed by the I.L.O. from data supplied on a not strictly comparable basis are identified in so far as possible in the column headings and footnotes.

* * *

SYMBOLS AND TYPES EMPLOYED

. = inapplicable or figures not available.
— = nil or negligible.
... = not yet received.
* = provisional.
r = revised since previous issue.

A line —— placed between two figures in a column indicates that the figures above and below it are not strictly comparable or that a new series begins below the line (see footnotes).

Figures in *italics*: index numbers based on another year than 1953.

The countries are arranged by continents in alphabetical order.

PART I

HOURLY WAGES OF ADULT WAGE EARNERS IN 41 OCCUPATIONS, OCTOBER 1959

In the following tables *wage rates* shown include, unless otherwise specified, cost-of-living or dearness allowances but exclude overtime and other premium pay ; statistics of *earnings* include payments for overtime as well as other premiums or bonuses. Unless otherwise specified, data shown refer to fully qualified male workers.

For the purpose of the inquiry, occupations were defined, in so far as applicable, according to the descriptions of the *International Standard Classification of Occupations* issued by the I.L.O. in 1958.

* * *

Hourly Wages of Adult Wage Earners in 41 Occupations

October 1959

PART II

MONTHLY SALARIES AND NORMAL HOURS OF WORK PER WEEK OF EMPLOYEES IN SELECTED OCCUPATIONS, OCTOBER 1959

Occupations for which data are presented in the following tables were chosen to represent a wide range of skills for both male and female salaried employees and to cover industrial, commercial and financial activities.

Since salaried occupations in many countries are characterised by differentials based on seniority, the length of service associated with the salary shown has been indicated in footnotes whenever possible. Footnote references also indicate special cases where payments in kind are received in addition to the salary shown, or where more than 12 monthly salaries are customarily paid in the year. Dearness or cost-of-living allowances are included in the figures shown unless otherwise specified.

For the purpose of the inquiry occupations were defined, in so far as applicable, according to the descriptions of the *International Standard Classification of Occupations* issued by the I.L.O. in 1958.

PART III

RETAIL PRICES OF SELECTED CONSUMER GOODS, OCTOBER 1959

In the following tables retail price data shown refer, unless otherwise specified, to articles of ordinary consumption. When prices were available for several qualities of a commodity, reporting countries were requested to select the one most commonly purchased by wage earners' families.

PUBLICATIONS OF THE INTERNATIONAL LABOUR OFFICE

Introduction to Work Study

This book describes as simply as possible the basic techniques of work study, giving examples of the applications of each. It is intended to serve as a textbook, and particularly for use in connection with technical assistance missions concerned with raising productivity. The techniques described represent systems which have been widely and successfully applied in many parts of the world for a number of years.

Part One. Productivity and Work Study.

Discusses the role of higher productivity in the raising of living standards, the causes of low productivity in an industrial undertaking and the techniques at the disposal of management to eliminate these causes, examines the human and physical environment in which work study is to be applied and stresses the importance of having good human relations and good working conditions throughout the undertaking before attempting to introduce work study.

Part Two. Method Study.

Deals with method study and devotes a chapter to each of its principal applications; by way of illustration an example of each of these is worked out and commented on. Many of these examples are drawn from the work of I.L.O. productivity missions and cover various industries and activities.

Part Three. Work Measurement.

Comprises six chapters on work measurement which include a discussion of the theory of rating and a basic time study fully worked out with explanatory notes. The method illustrated has been used successfully for over 30 years in many parts of the world and is being taught by most of the I.L.O. missions at the present time. One chapter is devoted to brief discussions of other techniques of work measurement including ratio-delay and predetermined motion times.

Part Four. Appendices.

Consists of nine appendices including a basic list of books on work study and management for further reading. Another appendix gives notes on the use of this book for teaching purposes, based on the experience of lecturers who used a limited provisional edition. Syllabuses for three types of work study course are given; there is an appendix containing definitions of the management terms used.

355 pages, including many diagrams, charts and tables and an index.

Price : $3.50 ; 21s.
